IBM and the Holocaust is the stunning story of IBM's strategic alliance with Nazi Germany. Edwin Black will show how IBM and its subsidiaries helped create the technologies that enabled the Nazis to target the Jews of Europe for asset confiscation, ghettoization, deportation, enslaved labor, and, ultimately, annihilation.

Programming was made possible, in part, by the Furman University Libraries and the Computer Science Department. Book sales and signing by author to take place after the program.

This exhibition was made possible by the generous support of lead sponsor Jeannie & Jonathan Lavine. Additional major funding was provided by the Bildners—Joan & Allen z"l, Elisa Spungen & Rob, Nancy & Jim; and Jane and Daniel Och.

The Museum's exhibitions are also supported by the Lester Robbins and Sheila Johnson Robbins Traveling and Special Exhibitions Fund, established in 1990.
